But with Chromebooks becoming more and more popular, it's time to learn some keyboard shortcuts at the keyboard for the Chrome operating system. Here are 10 to start ... Caps Lock Eliminates Key Block Block Your ChromeBook Outside Your Chromebook Quick Start Start App Pinned Pin A Window Left or Right Reduce a Window Maximize a Window Switch between Windows Task Manager 1. Caps Lock If â,¬ Ã "¢ has ever used a Chromebook, you know Google removed the Block Caps keyboard from the keyboard. In its place, you will find a search key or launcher depending on how much the new computer is. Fortunately, Google has a keyboard shortcut to activate the useful tool. To activate Caps Block, just hit Alt + Search / Launcher. After, all that you type will be in capital letters. To turn it off, simply prizes ... Alt + Search / Launcher. 2. Delete the key just like with the Caps key, Chromebooks do not offer a Delete button. While you usually can get around any elimination of words with the backspace, you can capture the delete key cancellation power by pressing ... alt + backspace.â, ã, 3. Block your chromebook if you are never moving away from your computer , It's a good idea to block your account so that no one can walk and use it. While you can go through the settings to do it, just hit the Search / Launcher + L button quickly block your chromebook and will take you to your lock screen. To return to your machine, you will need to enter the password or PIN. 4. Disconnect from your Chromebook alternatively to block your Chromebook, you can also log out of your account. This is useful when you may want to deliver the device for someone else to use with your account. To do this, hold down the Ctrl + Shift and then double pressure on ... 5. Start the Pling apps quickly if you like more Chromebook users, you probably have a handful of several applications pinned to your computer's application bar for access rapid. Instead of moving the cursor for each item and clicking on it, you can Use ... Alt + 1-9 to quickly open each app. The most significant slowdown for this shortcut is that you must remember the number of the number for each item. 6. PIN A window to the left or right with the Chrome operating system just like other main operating systems, it is possible to place windows to the left and right of the screen. If you don't want to drag each object on the left or right side, you can do it quickly to press ALT + [OÂ ¢]. 7. Minimize a window very similar to the option to fix a window on both sides of the screen, there is a keyboard shortcut to minimize the windows. To do this, this, Press ALT + Â ¢ â,¬ "and the window you have opened will be reduced in the taskbar. 8. Maximize a window now if you want to make a window, occupy the entire display of your chromebook, you can press ALT + =. Unfortunately, this does not work if the window is completely reduced to a minimum. You have to show it on the screen in a smaller shape factor. 9. Switch between Windows if you have more open windows, sometimes it can be a pain to pass quickly Among them. Fortunately, you can press Alt + Tab to pull up the Switcher Window tool and immediately highly have the next window. If the next window is not the one you want forward, just tap the card again tip © It does not highlight. Leave the keys to exchange the windows open. 10. Task Manager just like with Windows, you can open a task manager to see which programs and applets are in execution And in the background and using the resources of your Chromebook. To open this, press JIFD + ESC. From there, you can click on any running and ending. Extra: Learn more Keyboard shortcuts If these present keyboard shortcuts are sufficient for you, Chrome OS has a built-in tool to help teach different keyboard shortcuts. You can launch it via PressÂ ¢ Ctrl + Alt + /. Once opened, you can press on any single key or a key combination to learn what else you can do on your chromebook.
